

# MiniB memory map

## Introduction

This diagram illustrates the memory organisation within MiniB.

## Notes

Screen memory: this is simply a RAM copy of the write only LCD display.

Applications RAM: the base of applications RAM may move depending on ROMs 14 to 8.

OS workspace: do not assume that undocumented locations will remain fixed in the future.

ROMs 14 to 8: will also appear in ROMs 6 to 0 if read directly, but are otherwise ignored.

## History

V0.10 Preliminary release.
